

Fullstack Engineer with 3+ years of experience building production AI systems, multi-agent platforms, and scalable enterprise applications. Proven expertise in decomposing complex workflows into composable services, implementing self-improving feedback loops, and shipping systems that measure and iterate in real-world environments.

EXPERIENCE

Fullstack Web3 Developer <i>RapidNode</i>	JUL 2024 — PRESENT <i>Remote, India</i>
• Architected AI-powered multi-agent system decomposing data pipeline into discrete agents for airdrop discovery, scoring, and leaderboard generation • Implemented self-improvement loops: engineered feedback capture enabling agents to track accuracy and propose rule updates from production signals • Built Python/LangChain AI agent automating airdrop discovery from 10k+ daily tweets with PGVector-based semantic search • Engineered enterprise One View dashboard for investment firms tracking Discord, Twitter, and Telegram ecosystems • Tech: Python, LangChain, PGVector, Node.js, PostgreSQL, NestJS, TypeScript, RabbitMQ, Prometheus, Grafana	
Fullstack Developer (Part-time) <i>Syntax Studios</i>	MAY 2025 — PRESENT <i>Remote</i>
• Developed a Web3 Chrome wallet extension with Privy social login and cross-chain functionality • Maintained online quizzing platform, fixing production issues and implementing new features • Tech: React, Next.js, Node.js, TailwindCSS, Privy, Solidity, MongoDB	
Fullstack Blockchain Developer <i>Clamp</i>	JUN 2023 — JUN 2024 <i>Mumbai, India</i>
• Developed ERC4337 smart contract accounts using Factory pattern, reducing gas costs by 60% • Migrated React app to Next.js and launched React Native mobile app with CI/CD pipelines • Created ERC20 token-based rewards system and custom RainbowKit connector for Magic Auth • Tech: Solidity, Next.js, Node.js, TypeScript, MongoDB, React Native	

PROJECTS

HiringCafe AI Job Search CLI	2024
• Built conversational job search engine over 100K US job postings using hybrid vector similarity and structured SQL filtering • Engineered data pipeline analyzing 8GB JSONL file with 79-column PostgreSQL schema and two-pass ingestion for efficient vector writes • Implemented multi-turn conversation with sliding window token optimization and dynamic filter value injection • Tech: Python 3.12, PostgreSQL 16 + pgvector, OpenAI GPT-5.1, SQLAlchemy, Alembic, Typer	
Coinbase CDP Swap & Onramp Widget	2024
• Production-ready DeFi widget for token swapping and crypto purchasing on Base network with real-time quotes and smart routing • Implemented precise token approvals and on-chain transaction confirmation to minimize attack surface • Built Next.js 15 App Router with modular components, custom React hooks, TanStack Query, and Playwright E2E tests • Tech: Next.js 15, TypeScript, viem, Tailwind CSS, TanStack Query, Coinbase CDP, Radix UI, Playwright	

EDUCATION

Bachelor's of Engineering in Computer Science , Sarvajanic College of Engineering & Technology - CGPA: 8.79	2020 — 2024
High School , Scholar English Academy - 92.3% (PCM)	2018 — 2020

SKILLS

AI/ML & Agents	Claude API, LangChain, PGVector, Multi-agent systems, Prompt engineering
Programming Languages	Python, TypeScript, JavaScript, SQL
Backend & APIs	Node.js, Express, Nest JS, FastAPI, RabbitMQ
Web Development	NextJS (React), React Native, Tailwind CSS
Databases & State	PostgreSQL, MongoDB, Redis, PGVector
DevOps & Observability	Docker, Git, Prometheus, Grafana, AWS

ACHIEVEMENTS

• Winner of Binance Smart Chain and Linea track at EthBelgrade 2024	View Project
