

Founding-level engineer with 3+ years of experience building high-scale backend systems and AI-driven data pipelines. Expert in architecting distributed services, optimizing database performance, and integrating complex LLM workflows. Proven track record of shipping production-grade infrastructure that handles significant throughput and complex state management.

EXPERIENCE

Fullstack Web3 Developer <i>RapidNode</i>	JUL 2024 — PRESENT <i>Remote, India</i>
- Architected and scaled high-throughput AI data pipelines, reducing processing latency by 40% through optimized vector search and caching layers (PGVector/Redis). - Engineered autonomous AI agents, implementing robust error handling and monitoring using Prometheus/Grafana to maintain 99.9% service uptime. - Scaled backend services using Go and NestJS to handle 10k+ concurrent requests, ensuring system stability under high load. - Designed and maintained asynchronous message-driven architecture using RabbitMQ for reliable cross-service communication. - Built enterprise One View dashboard for investment firms tracking Discord, Twitter, and Telegram ecosystems. - Developed Go-based monitoring service handling 10,000+ nodes with Prometheus integration. Tech: Go, Python, PostgreSQL, NestJS, TypeScript, RabbitMQ, Prometheus, Grafana	
Fullstack Developer (Part-time) <i>Syntax Studios</i>	MAY 2025 — PRESENT <i>Remote</i>
- Led development of complex enterprise-grade dashboards, focusing on real-time data visualization and performant state management. - Integrated LLM-based workflows into existing product suites, improving automation capabilities for end-users. - Optimized frontend-to-backend data flow, significantly reducing payload sizes and improving overall application responsiveness. Tech: React, Next.js, Node.js, TailwindCSS, Privy, Solidity, MongoDB	
Fullstack Blockchain Developer <i>Clamp</i>	JUN 2023 — JUN 2024 <i>Mumbai, India</i>
- Developed core foundational services for cross-chain financial infrastructure, focusing on high-integrity data processing and transaction management. - Implemented automated CI/CD pipelines, streamlining deployment cycles and reducing production bugs by 60%. - Collaborated on the architecture of distributed systems, ensuring data consistency across multiple database instances. Tech: Solidity, Next.js, Node.js, TypeScript, MongoDB, React Native	

PROJECTS

Multichain Exchange Architecture	FEB 2024
- Built backend for a high-concurrency exchange, implementing Redis caching and optimized SQL queries to manage order books efficiently. Tech: Node.js, PostgreSQL, Redis, Docker, TypeScript	
Caravan Winner - Best UMA Use Case, EthOnline 2023	OCT 2023
- Developed cross-chain ERC4337 browser extension supporting 7+ blockchain networks. - Integrated social recovery mechanism and automated DAI staking (sDAI). Tech: Solidity, React, TypeScript, Tableland, UMA Across	
The Crypto Studio Runner-up Social Hour Hackathon, IPFS Microgrant	NOV 2022 - JAN 2023
- Created NFT platform supporting dynamic visualizations and audio-enhanced NFTs. Tech: Next.js, TypeScript, IPFS, Solidity	

EDUCATION

Bachelor's of Engineering in Computer Science, Sarvajani College of Engineering & Technology - CGPA: 8.79	2020 — 2024
High School, Scholar English Academy - 92.3% (PCM)	2018 — 2020

SKILLS

Programming Languages	TypeScript (Node.js/NestJS), Python, Go, SQL (PostgreSQL), JavaScript
Infrastructure & DevOps	AWS, Docker, RabbitMQ, Redis, Prometheus, Grafana, CI/CD
Systems & Architecture	Distributed Systems, RAG Pipelines, Vector Databases (PGVector), API Design, Microservices

ACHIEVEMENTS

Winner of Binance Smart Chain and Linea track at EthBelgrade 2024	View Project
Received a microgrant from IPFS for developing in the NFT ecosystem	View Project
Winner of Spheron and IPFS tracks in Polygon BUIDL IT 2022	View Project
